Professional Summary

Computer Programming & Analysis graduate with enterprise Software Engineering co-op experience at the Ontario Public Service. Background spanning backend APIs, cloud microservices, relational databases, and automated testing across regulated Agile environments. Hands-on experience developing dependable systems and developer tooling using Java, Python, TypeScript, SQL, Docker, and Microsoft Azure.

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, C++, HTML5, CSS3

Frontend & Mobile: React, React Native, Expo Router, Vite, Bootstrap

Backend & Cloud: Node.js, Express.js, Hono, REST APIs, JWT Authentication, AWS (S3, DynamoDB), Docker

Databases: PostgreSQL, Supabase, MySQL, MongoDB

AI, ML & LLMs: TensorFlow, OpenCV, Prompt Engineering, RAG, OpenAI Agents SDK, Tool-calling Agents, Structured Outputs (Zod), Vision AI (Gemini), Tavily Search API

Testing & QA: Jest, Selenium, Cucumber, Postman, Vitest

Technical Work Experience

Junior Software Engineer (Co-op)

Jan 2025 – Aug 2025

Ministry of Public and Business Service Delivery and Procurement - Government of Ontario, Toronto

- Recognized by the CIO for QA automation contributions that measurably improved test coverage and reduced manual testing effort across the Agile delivery team.
- Built and maintained automated test suites using Selenium and Cucumber for enterprise government applications, covering UI regression and integration scenarios.
- Executed API testing with Postman and validated system behaviour against acceptance criteria.
- Collaborated in Agile sprints with developers, QA engineers, and business analysts and documented defects with clear reproduction steps and tracked resolution in Jira.
- Produced test plans, defect reports, and sprint summaries to support stakeholder communication and continuous improvement.

Education

Computer Programming & Analysis - Advanced Diploma

Jan 2024 – Aug 2026

Seneca Polytechnic - Toronto

- Key Coursework: Object-Oriented Software Design (Java/C++), Data Structures & Algorithms, Relational Database Architecture (SQL), Web & Cloud Application Development, Software Quality Testing.

Certifications

- CS50's Introduction to Programming with Python - Harvard University (edX)
- Programming for Everybody (Python) - University of Michigan (Coursera)
- Career Essentials in Generative AI - Microsoft & LinkedIn

Technical Projects

Fragments | Cloud Microservice & REST API Engine |

Node.js, Express, AWS S3, DynamoDB, Docker, Jest

Seneca Polytechnic

- Engineered a containerized microservice REST API using Node.js and Express to convert, manage, and deliver diverse media formats for web clients.
- Implemented automated integration test suites using Jest and Supertest to enforce strict HTTP route contracts, status codes, and JWT authentication.
- Architected cloud storage integration with AWS S3 and DynamoDB metadata persistence, deploying via Docker containers to guarantee local-to-cloud parity.

Net & Notion | Cross-Platform Mobile Application Published on [Google Play](#) | React Native, Expo 54, Firebase
Seneca Polytechnic

- Developed and published a mobile productivity application to the Google Play Store using React Native, TypeScript, and Expo.
- Designed responsive user interface layouts and component states to ensure smooth interaction across various Android screen sizes and versions.
- Configured cloud data synchronization alongside offline local storage so users can manage entries seamlessly without losing work during network disconnects.

AI Developer Tooling Suite | TypeScript, Node.js, Hono, Zod
Seneca Polytechnic

- Architected a collection of developer productivity tools in TypeScript, including a vision-assisted screenshot error debugger, semantic code documentation search, and an automated PR audit agent.
- Implemented schema-level input/output validation with Zod and integrated REST APIs to streamline routine peer code reviews.

RXH Grand Hotel Management System | Java, SQLite, JDBC, OOP
Seneca Polytechnic

- Built an enterprise desktop management system using Java and Object-Oriented Programming (OOP) principles to process guest check-ins, reservations, and billing records.
- Designed and integrated a relational database schema using SQLite and JDBC to maintain accurate customer records and prevent double-booking discrepancies.

Additional Work & Community Experience

Achieving Equity Working Group - Volunteer Jan 2025 – Aug 2025
Ministry of Children, Community and Social Services - Government of Ontario, Toronto

- Contributed to equity and inclusion initiatives within the Ontario Public Service alongside the co-op engineering role.

Online English Tutor (Part-time) Oct 2023 – Feb 2024
Amir English Academy - Remote

- Delivered lessons via Zoom and Teams and adapted explanations to individual learning styles and tracked student progress across sessions.

Customer Service Associate (Part-time) May 2024 – Aug 2024
Clue Entertainment Centre - Toronto

- Managed high volumes of simultaneous customer interactions, maintaining accuracy and composure under pressure in a fast-paced environment.

Laboratory Assistant Intern Jan 2023 – May 2023
15-Khordad Educational and Treatment Center

- Organized, labelled, and maintained clinical records and laboratory materials with strict attention to accuracy and institutional procedure.
