Summary

Final-year Computer Programming & Analysis student at Seneca Polytechnic with a background in biology and laboratory science. Previously worked as a Co-op Software Engineer with the Government of Ontario, where I was recognized by the CIO for my QA contributions that improved automation coverage and testing efficiency across an Agile team. I enjoy building full-stack web applications, cloud-based microservices, machine learning and computer vision solutions, and AI-powered developer tools. I'm seeking opportunities in software development, QA automation, AI engineering, or health tech where I can solve meaningful problems, continue learning, and build technology that makes a real impact.

Work Experience

Junior Software Engineer (Co-op)

Jan 2025 – Aug 2025

Ministry of Public and Business Service Delivery and Procurement — Government of Ontario, Toronto

- Recognized by the CIO for QA automation contributions that measurably improved test coverage and reduced manual testing effort across the Agile delivery team.
- Built and maintained automated test suites using Selenium and Cucumber for enterprise government applications, covering UI regression and integration scenarios.
- Executed API testing with Postman and validated system behaviour against acceptance criteria; documented defects with clear reproduction steps and tracked resolution in Jira.
- Collaborated in two-week Agile sprints with developers, QA engineers, and business analysts to align test coverage with sprint goals and release criteria.
- Worked with Microsoft Azure services and Git in a regulated delivery environment requiring strict documentation, access controls, and security standards.
- Produced test plans, defect reports, and sprint summaries to support stakeholder communication and continuous improvement.

Achieving Equity Working Group — Volunteer

Jan 2025 – Aug 2025

Ministry of Children, Community and Social Services — Government of Ontario, Toronto

- Contributed to equity and inclusion initiatives within the Ontario Public Service alongside the co-op engineering role.
- Collaborated with cross-functional government teams to develop programming supporting a more inclusive workplace.

Online English Tutor (Part-time)

Oct 2023 – Feb 2024

Amir English Academy — Remote

- Delivered personalised lessons via Zoom, Teams, and Webex; adapted explanations to individual learning styles and tracked student progress across sessions.
- Strengthened clear technical communication and the ability to explain complex ideas simply — skills applied daily in documentation, code review, and Agile collaboration.

Customer Service Associate (Part-time)

May 2024 – Aug 2024

Clue Entertainment Centre — Toronto

- Managed high volumes of simultaneous customer interactions, maintaining accuracy and composure under pressure in a fast-paced environment.

Laboratory Assistant Intern

Jan 2023 – May 2023

15-Khordad Educational and Treatment Center

- Organised, labelled, and maintained clinical records and laboratory materials with strict attention to accuracy and institutional procedure.

- Applied systematic documentation and quality-control practices that directly inform current approach to software testing and reproducibility.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL

Frontend & Mobile: React, React Native, Expo Router, Vite, HTML5, CSS3, SCSS, Bootstrap

Backend & APIs: Node.js, Express.js, Hono

Cloud & DevOps: AWS (S3, DynamoDB), Docker, CI/CD

Databases: PostgreSQL, Supabase, MySQL, MongoDB

AI & ML & LLMs: TensorFlow, Keras, OpenCV, Prompt Engineering, RAG

Testing & QA: Jest, Selenium, Cucumber, Postman

Education

Computer Programming & Analysis — Advanced Diploma

Jan 2024 — Aug 2026

Seneca Polytechnic — Toronto

- Relevant courses: Data Structures & Algorithms, AI for Programmers, Cross-platform App Development, UI/UX Design, Cloud Computing for Programmers, Computer Vision, Application Development, OOP with C++, Advanced Database Services, Operating Systems.

Certifications

- CS50's Introduction to Programming with Python — Harvard University (edX)
- Programming for Everybody (Python) — University of Michigan (Coursera)
- Career Essentials in Generative AI — Microsoft & LinkedIn

Projects

Fragments | Node.js, Express, AWS S3, DynamoDB, Docker, Jest

Seneca Polytechnic

- Built a production-grade cloud microservice API for storing and converting user data fragments; integrated AWS S3 for object storage, DynamoDB for metadata, Passport.js for JWT + HTTP Basic auth, Docker for containerization, and Jest + Supertest + Hurl for testing.
- Built companion UI (Fragments UI) with full CRUD, type-based content conversion (Markdown→HTML, PNG↔JPEG), and AWS Cognito authentication flow.

Self-Driving Car Simulation | Python, TensorFlow, Keras, OpenCV, NumPy

Seneca Polytechnic

- Implemented NVIDIA's end-to-end CNN for autonomous steering; built full ML pipeline — dataset balancing, image augmentation (flip, brightness, zoom, pan), YUV preprocessing, EarlyStopping + ModelCheckpoint. Stable autonomous driving in Udacity simulator.

SettleCAN | React, Vite, Express.js, Supabase, PostgreSQL, Jest

Seneca Polytechnic

- Full-stack capstone (team of 5) helping newcomers to Canada navigate settlement resources. Owned Task Manager, Checklist, Community Hub, email notification service, unit tests, and database schema design.

AI Developer Tooling Suite | TypeScript, Node.js, Hono, Zod, OpenRouter

Seneca Polytechnic

- Monorepo of AI-powered tools: AI commit message generator, structured flashcard generator with few-shot prompting, GitHub PR analyser with chain-of-thought reasoning, and a multi-turn tool-calling agent loop over the OpenRouter LLM API.

RXH Grand Hotel Management System | Java, SQLite, JDBC, OOP

Seneca Polytechnic

- Designed full ERD, normalised SQL schema with FK constraints, and Java service layer for guest check-in/out, room booking, loyalty programmes, waitlists, and admin dashboard with revenue reporting. Team of 4.
