Objective

Computer Programming & Analysis graduate from Seneca Polytechnic with co-op experience as a Software Engineer with the Ontario Public Service. Recognized by the CIO for QA contributions that improved testing efficiency. Builds full-stack web apps, cloud microservices, published mobile applications, and AI-powered tooling including RAG pipelines, tool-calling agents, and vision AI systems. Seeking software development, QA automation, or AI engineering roles.

Work Experience

Junior Software Engineer (Co-op)

Jan 2025 – Aug 2025

Ministry of Public and Business Service Delivery and Procurement - Government of Ontario, Toronto

- Recognized by the CIO for QA automation contributions that measurably improved test coverage and reduced manual testing effort across the Agile delivery team.
- Built and maintained automated test suites using Selenium and Cucumber for enterprise government applications, covering UI regression and integration scenarios.
- Executed API testing with Postman and validated system behaviour against acceptance criteria.
- Collaborated in Agile sprints with developers, QA engineers, and business analysts and documented defects with clear reproduction steps and tracked resolution in Jira.
- Worked with Microsoft Azure services and Git in a regulated delivery environment.
- Produced test plans, defect reports, and sprint summaries to support stakeholder communication and continuous improvement.

Achieving Equity Working Group - Volunteer

Jan 2025 – Aug 2025

Ministry of Children, Community and Social Services - Government of Ontario, Toronto

- Contributed to equity and inclusion initiatives within the Ontario Public Service alongside the co-op engineering role.

Online English Tutor (Part-time)

Oct 2023 – Feb 2024

Amir English Academy - Remote

- Delivered lessons via Zoom and Teams and adapted explanations to individual learning styles and tracked student progress across sessions.
- Strengthened clear technical communication and the ability to explain complex ideas simply

Customer Service Associate (Part-time)

May 2024 – Aug 2024

Clue Entertainment Centre - Toronto

- Managed high volumes of simultaneous customer interactions, maintaining accuracy and composure under pressure in a fast-paced environment.

Laboratory Assistant Intern

Jan 2023 – May 2023

15-Khordad Educational and Treatment Center

- Organised, labelled, and maintained clinical records and laboratory materials with strict attention to accuracy and institutional procedure.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL

Frontend & Mobile: React, React Native, Expo Router, Vite, HTML5, SCSS, Bootstrap

Backend & APIs: Node.js, Express.js, Hono, REST APIs, JWT Authentication

Cloud & DevOps: AWS (S3, DynamoDB), Docker, CI/CD

Databases: PostgreSQL, Supabase, MySQL, MongoDB

AI & ML & LLMs: TensorFlow, OpenCV, Prompt Engineering, RAG, OpenAI Agents SDK, Tool-calling Agents, Structured Outputs (Zod), Vision AI (Gemini), Tavily Search API

Testing & QA: Jest, Selenium, Cucumber, Postman, Vitest

Education

Computer Programming & Analysis - Advanced Diploma

Jan 2024 – Aug 2026

Seneca Polytechnic - Toronto

- Relevant courses: Data Structures & Algorithms, AI for Programmers, Cross-platform App Development, UI/UX Design, Cloud Computing for Programmers, Computer Vision, Application Development, OOP with C++, Advanced Database Services, Operating Systems.

Certifications

- CS50's Introduction to Programming with Python - Harvard University (edX)
- Programming for Everybody (Python) - University of Michigan (Coursera)
- Career Essentials in Generative AI - Microsoft & LinkedIn

Projects

Net & Notion | React Native, Expo 54, Firebase | Published on [Google Play](#) Seneca Polytechnic

- A mobile app for saving professional contacts with context. Generates QR codes for quick contact sharing and supports camera scanning. Works on Android, iOS, and web. Currently published on the Google Play Store. Built with a team of 4.

AI Developer Tooling Suite | TypeScript, Node.js, Hono, Zod, OpenRouter Seneca Polytechnic

- A collection of AI-powered tools built to automate common developer tasks.
- Includes: a tool that reads a screenshot of an error and explains how to fix it using a vision AI model; a search engine that finds relevant products using meaning rather than keywords; a Q&A tool that answers questions about the Node.js documentation using a local vector database; an agent that analyses GitHub pull requests and gives structured feedback; and a job search assistant that scrapes postings, analyses your resume against them, and flags suspicious listings.

Fragments | Node.js, Express, AWS S3, DynamoDB, Docker, Jest Seneca Polytechnic

- A cloud API that lets users store, retrieve, and convert text and image data. Supports multiple formats like plain text, Markdown, HTML, PNG, JPEG and converts between them on request. Built with AWS S3 for file storage, DynamoDB for metadata, Docker for deployment, and full JWT authentication. Tested end-to-end with Jest, Supertest, and Hurl.
- Includes a companion web app (Fragments UI) where users can log in, manage their stored data, and convert content types directly in the browser.

Self-Driving Car Simulation | Python, TensorFlow, Keras, OpenCV, NumPy Seneca Polytechnic

- A machine learning model that learns to steer a car autonomously in a driving simulator. Trained on camera footage from the simulator using NVIDIA's neural network architecture. The model drives the car in the Udacity simulator without human input.

SettleCAN | React, Vite, Express.js, Supabase, PostgreSQL, Jest Seneca Polytechnic

- A web app that helps newcomers to Canada find and track settlement resources - work permits, health services, housing checklists, and community tools. Built with a team of 5.

RXH Grand Hotel Management System | Java, SQLite, JDBC, OOP Seneca Polytechnic

- A desktop application that manages all core hotel operations - guest check-in and check-out, room bookings, loyalty programme tracking, and waitlists. Includes an admin dashboard with revenue reports and activity logs. Designed the full database from scratch including the schema, table relationships, and constraints. Team of 4.
